Especially to incorporate the Java programming language, also assuming Brendan Eich to incorporate the patterns language. [6] Netscape decided soon that the best option was that Eich create a new language, but with syntax similar to java and javascript, with the new syntax similar to scheme or other existing scripting languages. [5] [6] Even if the language and its interpreting implementation were called Livescript when it was sent for the first time as part of a Beta Navigator in September 1995, the name was changed to Javascript for release Official in December. [6] [11] [18] The choice of the name Javascript caused confusion, implying that it is directly related to Java. Accessible to non - technical people, he played a leading role in the rapid growth of the nascent World Wide Web. [15] The main Mosaic developers then founded the Netscape company, which released a more lucid browser, Netscape Navigator, in 1994. // Note that this leads to a wrong result if the members of the LcMcalculator "A" /E/O "object B" are modified later.) // Furthermore, 'gcd' == 'gcd', this ['gcd'] = 'this.gcd this ['gcd'] = function () {return to; }; return to; }, // The names of owners 'ownership can be specified by means of double (") or single (') strings.
